

SLEMAN ALDDBBAS

BACK-END DEVELOPER

Damascuse Rukn al-Din, Syria • sleman.aldbbas.it@gmail.com
<https://github.com/sleman-dbas>

SUMMARY

Back-End developer with a strong foundation in building secure and scalable. Passionate about backend architecture, authentication, and session management. Looking for an opportunity as a Back-End developer where I can expand my knowledge and skills while making a meaningful contribution to the success of the company.

WORK EXPERIENCE

Back-End Developer

March 10, 2023

- I began learning Back-End development on March 10, 2023, starting with the fundamentals of server-side programming using Node.js and Express. My early focus was on building RESTful APIs, understanding authentication and session management, and working with databases like MongoDB and PostgreSQL. I gradually expanded my skills to include NestJS and integration with React.js for full-stack applications. This phase marked a turning point in my technical journey, where I transitioned from theory to hands-on practice, documenting lessons learned and applying best practices in security, modularity, and performance.

Focus Company – Damascus, Syria

August 14, 2024 – November 30, 2024

- Developed and maintained server-side applications using Node.js, Express, and NestJS.
 - Integrated MongoDB and PostgreSQL databases for scalable and secure data management.
 - Collaborated with front-end developers using React.js to deliver dynamic, responsive user experiences.
 - Focused on API design, authentication, session handling, and performance optimization.
 - Applied best practices in code modularity, security, and documentation.
-

EDUCATION

Bachelor of Software Engineeringin

2021 – 2026 (Expected)

Al-Sham Private University – Damascus, Syria

- Completed core courses in Object-Oriented Programming, Data Structures, and Software Engineering.
- Gained strong theoretical and practical foundation in backend development and system architecture.

I have obtained a Certificate of Experience from Focus Company

2024/08/14 – 2024/11/30

ADDITIONAL INFORMATION

- **Technical Skills:** Front_End developer
- **Languages:** English, Arabic
- **Awards/Activities:** I developed a project about system to control in teachers and students with special system for marks with GUI in my second year, volunteer to design a website for the team Read with my eyes team
